

Is Ankylosing Spondylitis Pain Burning Through Your Life?

If you have ankylosing spondylitis, were diagnosed before the age of 45, and have experienced symptoms for at least 3 months, you might qualify for the **BE AGILE 1** clinical research study.

Our team of medical professionals is evaluating an investigational medication to see if it helps suppress joint related symptoms experienced with ankylosing spondylitis by targeting key proteins that are involved in the inflammatory processes.

QUALIFIED PARTICIPANTS MAY RECEIVE:

- Research study medication for ankylosing spondylitis at no cost
- Study-related care from a local doctor at no cost
- Reimbursement for time and travel
