

Smoking! The long term effects may be a risk factor for developing lung disease. A research study on the early detection of lung cancer and other smoking related lung diseases is currently being conducted. If you are 40 to 75 years of age and are a current or former smoker you may qualify. Participants will receive study-related tests at no cost. Compensation will be provided. For more information call Lovelace Scientific Resources at 505-348-9700
